- Healthy Home Solutions
- Alternative Energy
- Water Efficiency Solutions
- Alternate Construction Techniques

Construction:

- Custom Homes
- Additions
- Renovations
- Geothermal Solutions
- Solar Energy Solutions
- Hydronic Radiant Floor Heating.

Designing is more than just drawing floors, walls and roofs. Construction techniques and mechanical systems must all work together as a fully functional system.

Few people know this as well as **Lagois Drafting and Construction**. At Lagois, design and construction technologies are constantly evolving. This means a holistic – practical yet innovative – design approach to all Lagois projects. It is the core of what Lagois has believed in and provided for 25 years.

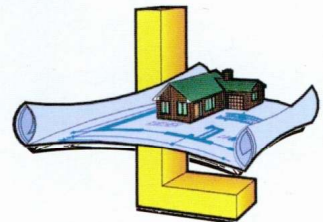

Lagois services are unique because their clients own the drawings when they are complete. Clients can then choose their own builder, build themselves, or continue with Lagois for construction services.

Lagois Drafting and Construction is proud of the fact that it is an award-winning company. It knows construction and design inside out. "Our designers have on-site experience."

Construction and design experts use the latest software. This allows them to input various construction techniques as well as heating/cooling systems. They can calculate annual energy consumption costs and compare payback periods for various options.

After 25 years, Lagois keeps going into the future, glad to be a part of the evolution of the construction, mechanical, and design industry.
